

Florida Water and Climate Alliance

Knowledge Management System &
FloridaWCA.org

By: Dr. Tracy Irani & Erica Odera

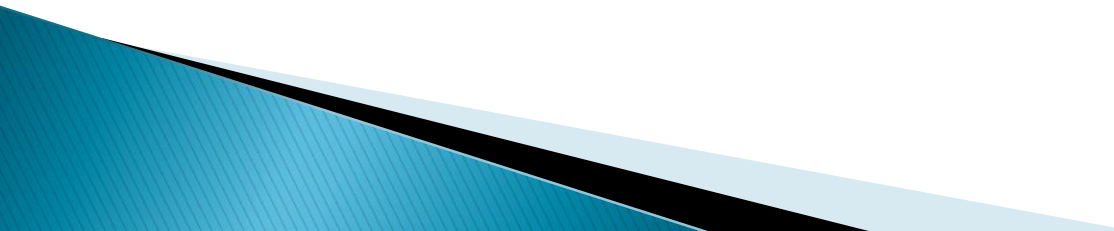

Process and History

- ▶ Definition of KMS
 - ▶ The NOAA grant included the creation of a KMS
 - ▶ Chose an easily updateable website as the basis of this system
 - ▶ Subcommittee provided input and reviewed the site
 - Jayantha Obeysekera
 - Alison Adams
 - Fran Henderson
 - Wendy Graham
 - Rhonda Haag
- 

Creating the Site

- ▶ Contacted two web specialists– a designer and a developer
- ▶ Purchased domain name based on the name voted on and chosen by group (<http://www.floridawca.org>)
- ▶ Set up the site through ready made template in Drupal
- ▶ Worked through the category/topic descriptions given from last group meeting
- ▶ Organized existing material on the “old” site into “new” categories and topics

Tour of the Site

- ▶ I will walk you through the site as a “user”
 - ▶ Please write down notes of suggestions, comments or edits you would like to see made on the paper provided
 - ▶ We will discuss these briefly at the end, and I will have a copy of your ideas to hold onto for revisions after the meeting
- 

Site Management and Review

- ▶ Peer review process before accepted new content onto the web page
- ▶ “Expert” reviewers could serve that have experience or expertise in specific sectors
 - Recent subcommittee meeting showed support for this idea
